

Card Clarifier

Shield Stone can only be used at the end of your turn. If you have other “end of turn” cards, you may play them in any order.

The creature you place Shield Stone upon cannot be attacked during your opponent’s next turn. However, Shield Stone only prevents attack damage from your opponent’s creatures (damage from your opponent’s creatures during your opponent’s attack phase). Shield Stone does not prevent damage dealt by relic or sorcerer cards and it does not prevent damage from creature abilities that are not considered attacks. *Example: Shield Stone does not prevent damage from Sneaky Slingshot (relic) or Zeth (sorcerer) and does not prevent the non-attack damage from creatures such as Tickamite, Morticus, and Jaden.*
